

MGH INSTITUTE OF HEALTH PROFESSIONS

Genetic Counseling

**Do you or a loved one have Huntington's disease (HD)?
Are you interested in learning more about clinical trials?
Would you like to contribute to HD research?**

You are invited to participate in a research project conducted at the MGH Institute of Health Professions' Genetic Counseling Program.

In this study, we're piloting an educational video designed to teach people in the HD community more about clinical trials.

This study is open to anyone who is at least 18 years old and fits at least **one** of the following criteria:

- You currently have HD
- You are at risk for developing HD
- You are a caretaker for someone with HD

To participate in the study, you will be asked to watch an educational video and complete an online survey. The study should take about 25 minutes to complete. At the end the study, you may select the option to be contacted for further research. **Those who complete the study will be eligible to win a \$25 Amazon e-gift card.**

To take the survey or for more information about the study, please click on this link. You may also copy and paste the link to your browser or use the QR code below.
